About Me

I'm a passionate Full-Stack Developer, Funnel & Smart Contract Engineer, and Creative Designer. I specialize in building conversion-focused systems, Web3 solutions, and engaging book trailers/mockups for authors. My motivation is to create technology and designs that solve problems, drive growth, and inspire people.

Skills

Development	Creative Design	Marketing & Business
Full-Stack (HTML, CSS, JavaScript, React, Node.js, MongoDB, MySQL) Smart Contracts (Solidity, Web3.js, NFT, DeFi) Automation (Zapier, Make, Pabbly, APIs)	Book Trailers & 3D Mockups Web & Brand Design (Figma, Canva)	Email Automation Flows Ad Management Sales Funnel Optimization

Experience

Freelance Funnel & Smart Contract Developer (2023 – Present) – Delivered custom automation systems and blockchain solutions.

Book Trailer & Mockup Designer (2023 – Present) – Created cinematic trailers and 3D mockups for authors.

Shopify Expert & Web Developer (2022 – Present) – Built optimized stores and customer experiences.

Projects

- **Smart Contract & NFT Services** – Secure, gas-optimized NFT minting contracts and Web3 marketplace integrations.
- **Sales Funnel Automation for DANZAS** – Built a fully automated onboarding and membership system.
- **Book Trailers & 3D Mockups** – Boosted author visibility and ad performance.
- **Shopify & E-commerce Development** – Designed optimized stores with automated funnels.

Education

Currently learning advanced Full-Stack Development with focus on AI & blockchain integration. Aspiring Aeronautical Engineer with deep passion for technology, trading, and problem-solving.
